

MARINE MAMMAL SURVEY IN BANG PA KONG ESTUARINE

Group 2

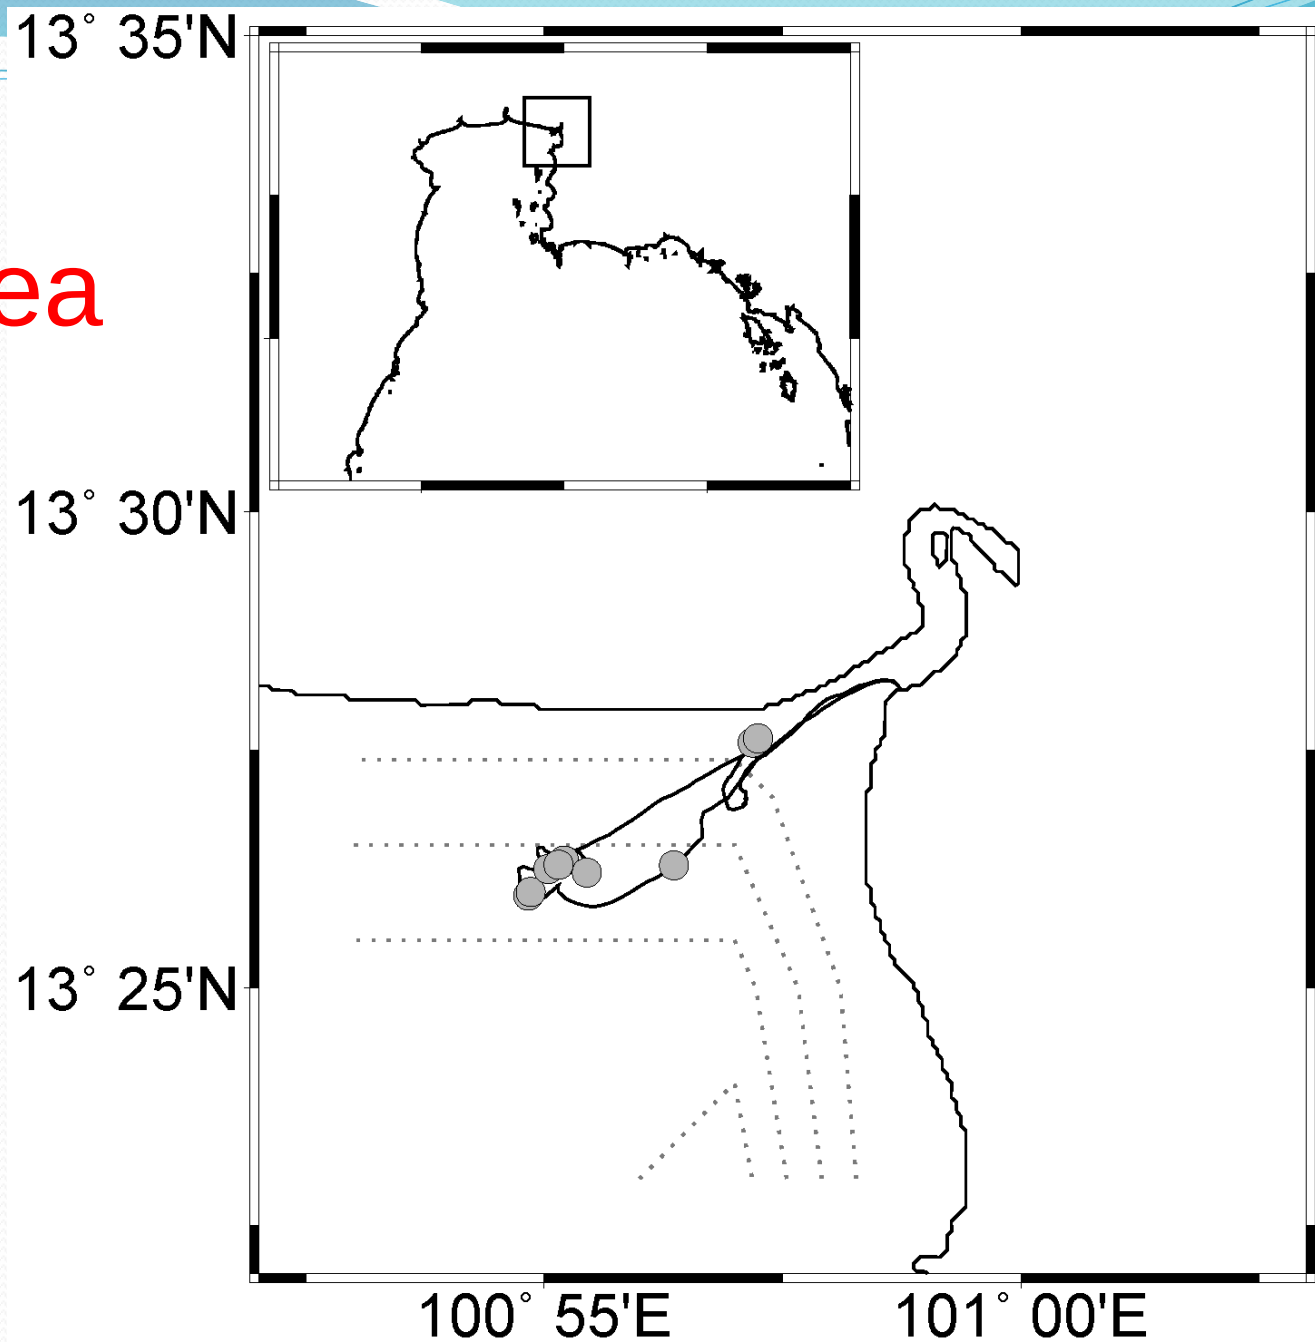

- Mr. Joseph Chistopher Rayos
- Mr. Pornanan Keereerut
- Mr. Tu Hoang Nhan
- Mr. Tossaporn Sukhapindha
- Ms. Chalati Junchompoo
- Mr. Thanainun Knowcome
- Mr. Attapol In-pang
- Ms. Saisunee Chaksuin
- Ms. Thananya Inthasak

Oceanographic information

During the time of observations

Water Parameter	ST.1	ST.2
Depth (m.)	1.7	1.6
DO (mg/L)	7.32	6.47
Temp.(C)	28.9	28.9
pH	7.3	7.9
Salinity (psu)	33.5	31.4
Conductivity (us/cm)	51408	48949
Turbidity (ntu)	3.1	18.8

Survey Area

Time of observation:1000hr

Distinguishing characteristic

- * Nicked on the tip of the Dorsal fin
- * Scars on the right side of the body

Time of observation: 1129hr

Distinguishing characteristic

- * Nicked on the tip and posterior of the Dorsal fin
- * Scars on the left side of the body

Ob-BPK-003

Time of observation: 1156hr

Distinguishing characteristic

- * Dorsal fin nicked w/ bite scar on the right anterior part
- * Scars on the left side of the body

Ob-BPK-004

Time of observation: 1157hr

Distinguishing characteristic

- * Dorsal fin complete with scars on the side
- * Scars on the left side of the body

Time of observation: 1157hr

Distinguishing characteristic

- * Dorsal fin nicked on the upper posterior portion
- * Scars on the right side of the body

Ob-BPK-006

Time of observation: 1158hr

Distinguishing characteristic

- * Dorsal fin nicked on the tip
- * Bite Scars on the right side of the body

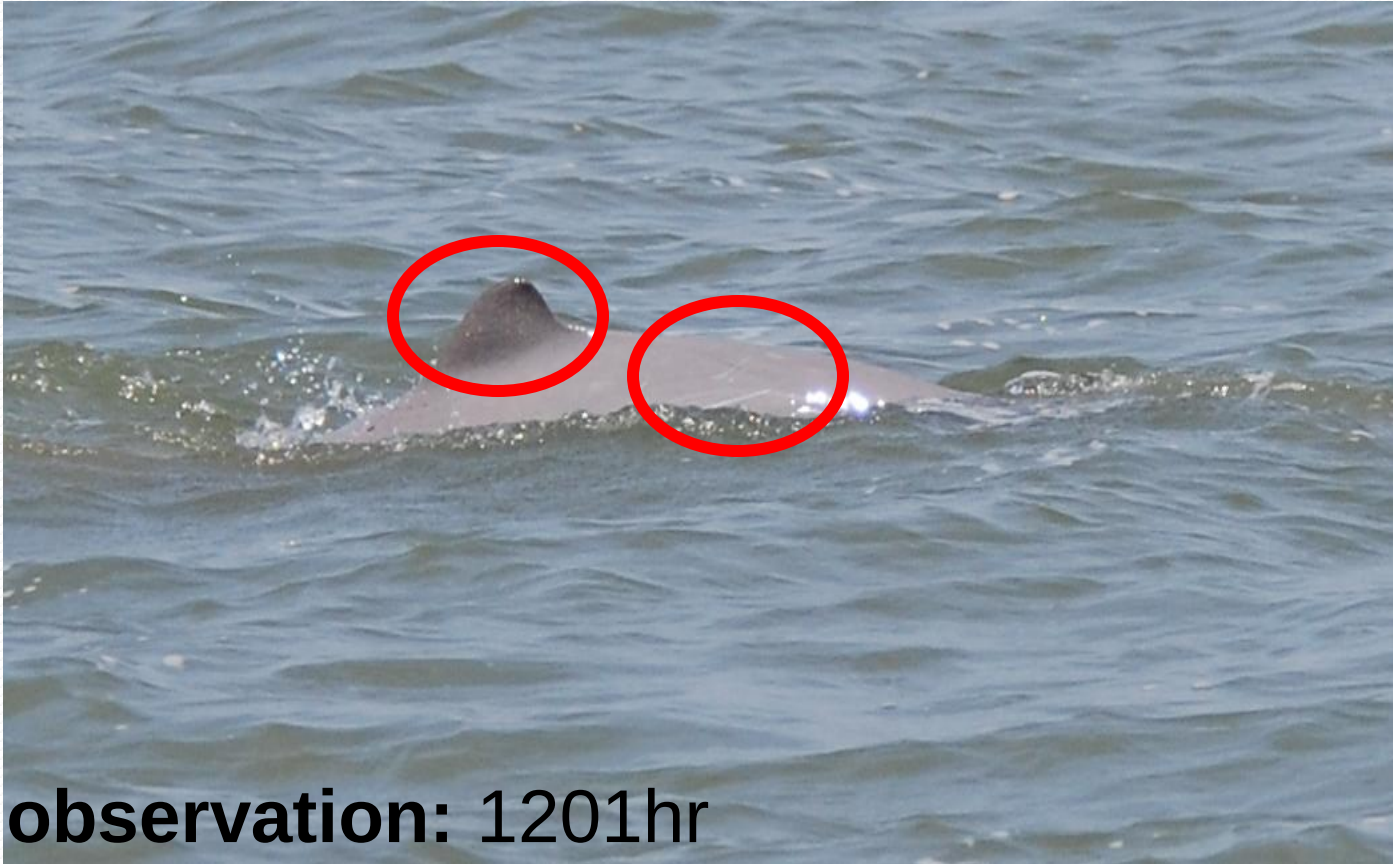

Time of observation: 1159hr

Distinguishing characteristic

- * Dorsal fin nicked w/ 2 small holes on the posterior
- * Scars on the right side of the body

Ob-BPK-008

Time of observation: 1201hr

Distinguishing characteristic

- * Dorsal fin complete
- * Scars on the left side of the body

Ob-BPK-009

Time of observation: 1206hrs

Distinguishing characteristic

- * Dorsal fin with V-shaped cut on the anterior
- * Scars on the right side of the body

Ob-BPK-010

Time of observation: 1209hrs

Distinguishing characteristic

- * Dorsal fin smooth and no scars on the side
- * Scars on the right side of the body

Ob-BPK-011

Time of observation:

Distinguishing characteristic

- * Dorsal fin nicked on base of the posterior
- * Minimal scars on the right side of the body

Ob-BPK-012

Time of observation: 1218hrs

Distinguishing characteristic

- * Dorsal fin nicked on the posterior base
- * Scars on the right side of the body

Ob-BPK-013

Time of observation: 1216hrs

Distinguishing characteristic

* Dorsal fin nicked V-shaped on the posterior

Ob-BPK-014

Time of observation: 1216hrs

Distinguishing characteristic

* Dorsal fin nicked V-shaped on the upper anterior

Ob-BPK-015

Time of observation: 1216hrs

Distinguishing characteristic

- * Dorsal fin nicked on the middle posterior
- * Minimal body scars

Ob-BPK-016

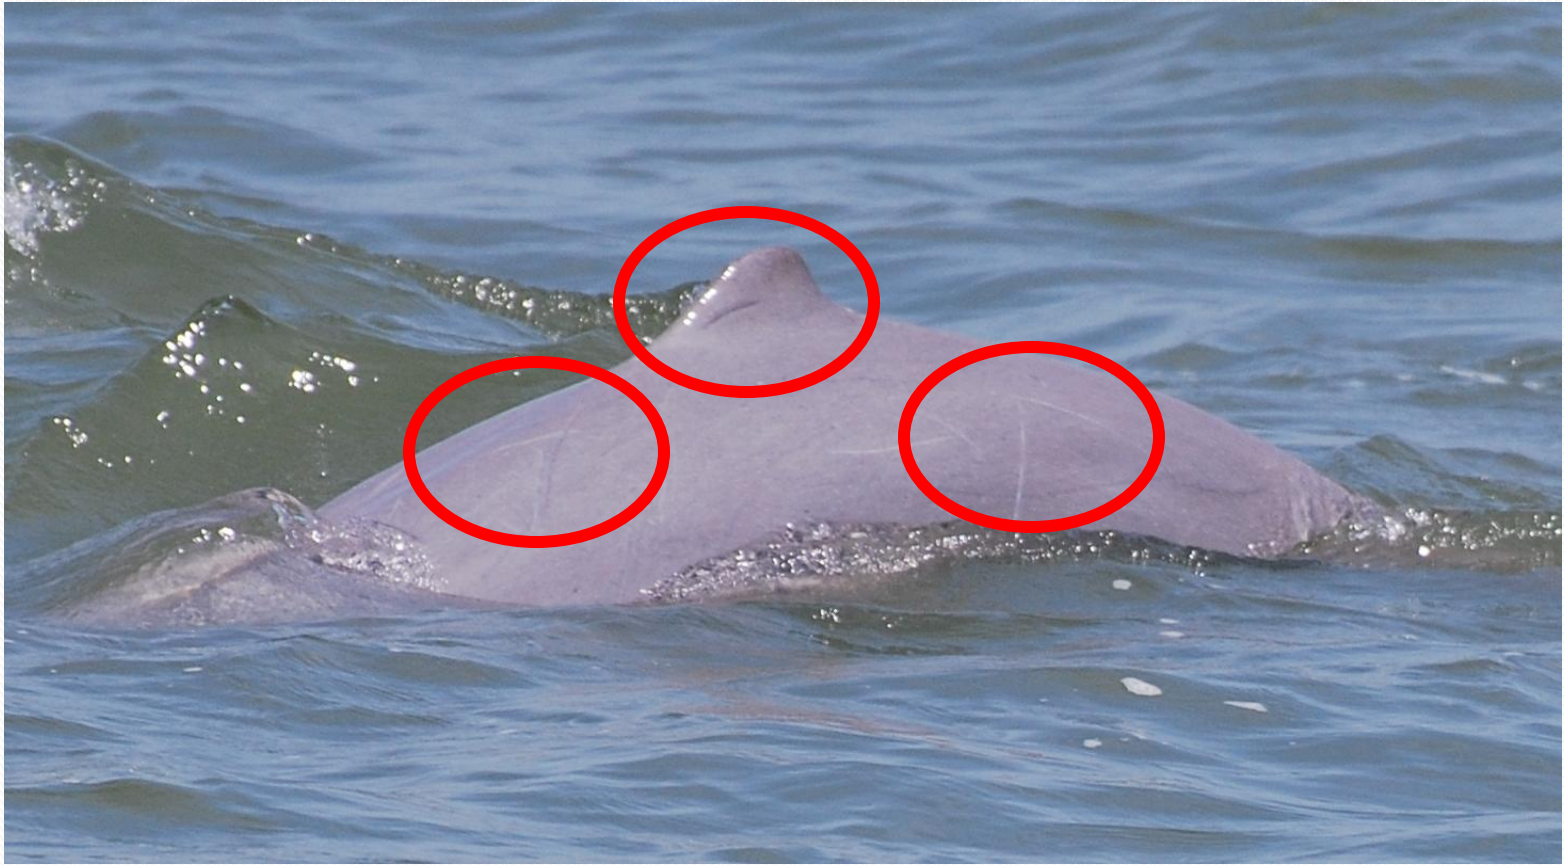

Time of observation: 1152hrs

Distinguishing characteristic

- * Dorsal fin complete
- * Minimal scars on the right of the body

Ob-BPK-017

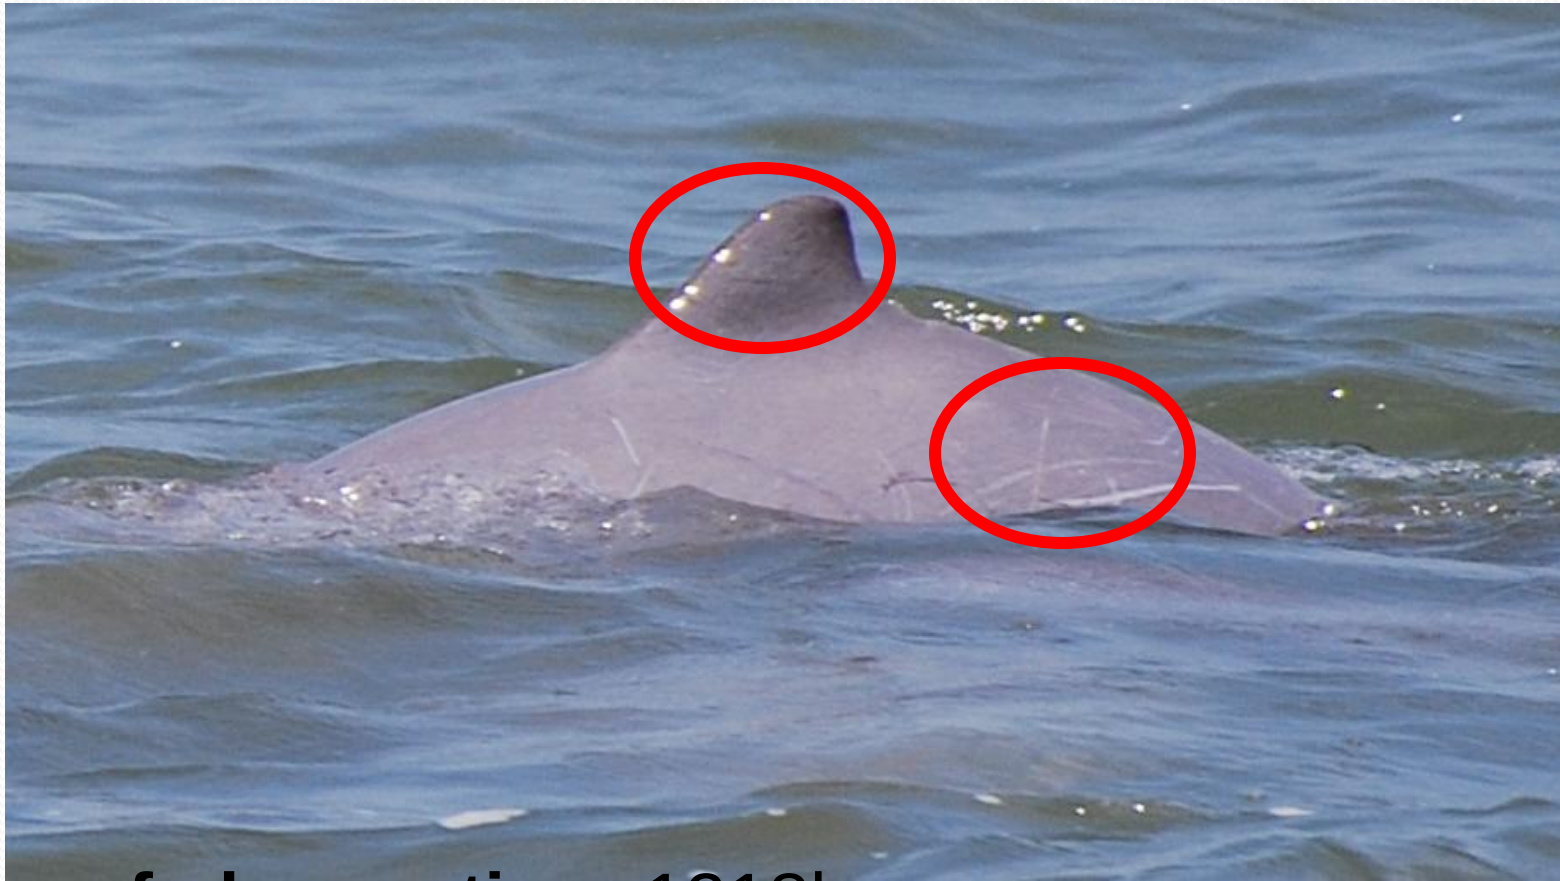

Time of observation: 1218hrs

Distinguishing characteristic

- * Dorsal fin complete with scars on the left side
- * Scar on the left side of the body

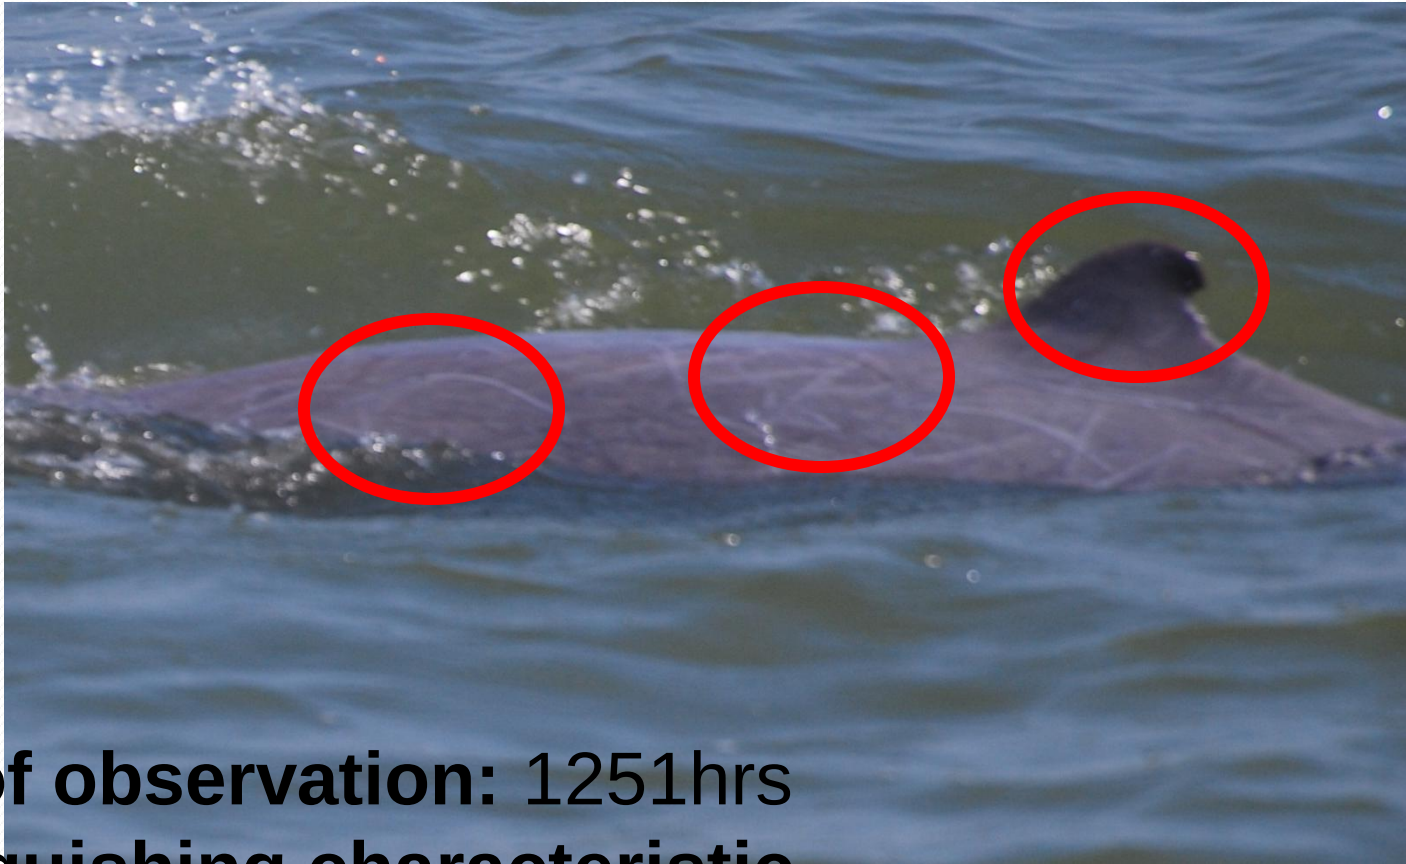

Ob-BPK-018

Time of observation: 1218hrs

Distinguishing characteristic

- * Dorsal fin complete with scars on the left side
- * Scar on the left side of the body

Time of observation: 1251hrs

Distinguishing characteristic

- * Dorsal fin nicked on the posterior
- * Scar on the left side of the body
(from base of the dorsal to interiorly)

THANK YOU
